

# CRESCENT LAKE ASSOCIATION

## 2023 Fireworks

Thank you to our volunteers that helped make the fireworks show a success again this year!

This crew does the heavy lifting of the mortar tube boxes and secures them to the ground.

Mortar Tube Setup Crew

This crew loads the fireworks into the tubes and arranges the boxes of multi-shell fireworks and secures them. All are wired to a nearby satellite control on the ground for firing.

Fireworks Loading & Wiring Crew

This is what the site looks like after the wiring is completed.

## Cleanup Crew

The cleanup crew has the important job of returning the site back to its original condition before the fireworks. There are several large garbage bags of debris that are picked up along with the heavy lifting of the mortar boxes and loading them into a trailer.

Special thanks to the O'Melia family for allowing us to use their lot for the fireworks show. Thank you to those that made a donation to support the fireworks show. The cost of the fireworks is fully funded by your donations.

A big thanks to Larry McKittrick, our fireworks coordinator and pyrotechnic genius, for all the time and ingenuity he puts into making the show a success. Also, thanks to his son Scott for helping out every year and training those of us volunteers.

Thank you volunteers!
